Diesel, Semidiesel & Dual Fuel Engines (Automotive) World Report

This research provides World Data on Diesel, Semidiesel and Dual Fuel Engines (Automotive). The report is available in several Editions and Parts and the contents and cost of each part is shown below. The Client can choose the Edition required; and subsequently any Parts that are required from the After-Sales Service.

Diesel, Semidiesel & Dual Fuel Engines (Automotive) World Report

Description

Diesel, Semidiesel & Dual Fuel Engines (Automotive)

DIESEL ENGINES / AUTOMOTIVE WORLD REPORT

The Diesel, Semidiesel & Dual Fuel Engines (Automotive) World Report gives Market Consumption / Products / Services for over 200 countries by each Product by 3 Time series: From 2007, Forecast to 2028.

Countries covered include: Albania, Algeria, Angola, Argentina, Armenia, Aruba, Australia, Austria, Azerbaijan, Bahamas, Bahrain, Bangladesh, Barbados, Belarus, Belgium, Belize, Bolivia, Bosnia and Herzegovina, Botswana, Brazil, Bulgaria, Cambodia, Cameroon, Canada, Chile, China, Colombia, Costa Rica, Cote d'Ivoire, Croatia, Cuba, Cyprus, Czech Republic, Denmark, Dominica, Dominican Republic, Ecuador, Egypt, Eire, El Salvador, Eritrea, Estonia, Ethiopia, Finland, France, French Guiana, Gabon, Gambia, Georgia, Germany, Ghana, Greece, Guadeloupe, Guatemala, Guinea, Guinea-Bissau, Guyana, Haiti, Honduras, Hungary, Iceland, India, Indonesia, Iran, Iraq, Israel, Italy, Jamaica, Japan, Jordan, Kazakhstan, Kenya, Kuwait, Kyrgyzstan, Laos, Latvia, Lebanon, Lesotho, Liberia, Libya, Lithuania, Luxembourg, Macedonia, Madagascar, Malawi, Malaysia, Malta, Martinique, Mexico, Moldova, Montenegro, Morocco, Mozambique, Namibia, Netherlands, Netherlands Antilles, New Zealand, Nicaragua, Nigeria, Norway, Oman, Pakistan, Panama, Papua New Guinea, Paraguay, Peru, Philippines, Poland, Portugal, Puerto Rico, Qatar, Reunion, Romania, Russia, Saudi Arabia, Senegal, Sierra Leone, Singapore, Slovakia, Slovenia, South Africa, South Korea, Spain, Sri Lanka, Sudan, Suriname, Swaziland, Sweden, Switzerland, Syria, Taiwan, Tajikistan, Tanzania, Thailand, Trinidad and Tobago, Tunisia, Turkey, Turkmenistan, Uganda, Ukraine, United Arab Emirates, United Kingdom, United States, Uruguay, Uzbekistan, Venezuela, Vietnam, Zambia, Zimbabwe.

WORLD & NATIONAL REPORT MARKET DATABASE & SPREADSHEETS. FINANCIAL SPREADSHEETS & DATABASES. INDUSTRY SPREADSHEETS & DATABASES.

The report is on a DVD containing the entire web and databases; it is also delivered as an online download. Merge text, tables & databases for your own reports, spreadsheet calculations & modelling.

6 Products/Markets covered, 2045 pages, 9772 spreadsheets, 9781 database tables, 537 illustrations. Updated monthly. 12 month After-Sales Service.
REPORT EDITIONS

Diesel, Semidiesel & Dual Fuel Engines (Automotive)

The report on Diesel, Semidiesel & Dual Fuel Engines (Automotive) is available in several editions, and also there are various additional elements available from the After-Sales Service.

World Report
The World Report gives market data for Diesel, Semidiesel & Dual Fuel Engines (Automotive) on each of the Product and Market Sectors for about 200 countries. There are data caveats on country data because in certain countries the data may not be available.

Cost £ 2850

Regional Report
There are 9 Regional reports available which give market data for Diesel, Semidiesel & Dual Fuel Engines (Automotive) on each of the Product and Market Sectors for countries in a particular Region. There are data caveats for some country data because in certain countries the data may not be available.

1. Canada & USA
2. Central America (31 Countries)
3. South America (13 Countries)
4. Europe (44 Countries)
5. Eurasia (4 Countries)
6. Middle East (19 Countries)
7. Africa (54 Countries)
8. Asia (24 Countries)
9. Oceania (17 Countries)

See the countries in each Regional Report Appendix 1

Cost £ 1950

Country Report
There are Diesel, Semidiesel & Dual Fuel Engines (Automotive) Country Reports available for most countries. Country Reports provide detailed information on the target country.

Cost £ 1450

Town & Country Report
The Diesel, Semidiesel & Dual Fuel Engines (Automotive) Town + Country Reports provides users with commercial intelligence on markets and industry in a particular country, plus market, financial and industry data on each of the significant Cities and Towns in the country. For the larger countries, like China, India, the USA, Brazil, et al, the data is generally limited to the top 500 Cities and Towns within the country.

Cost £ 2850
Diesel, Semidiesel & Dual Fuel Engines (Automotive) World Report

**DIESEL ENGINES / AUTOMOTIVE**

**Markets & Products**

The report will give market data for each of the below Diesel, Semidiesel & Dual Fuel Engines (Automotive) Product and Market Sectors, by year Historic: from 2007, and a Forecast by year to 2028. Data will be given for about 200 countries.

To see what such Country spreadsheets looks like see:

Year / Country Totals (2007 to 2028).
http://www.datagroup.org/XLS_File_Samples/Year_2010_Country_Values_Dollars.xls

The Diesel, Semidiesel & Dual Fuel Engines (Automotive) World Report provides data on the net market for the Products and Services covered in each of 205 countries. The Products and Services covered (Diesel, Semidiesel and Dual Fuel Engines (Automotive)) are classified by the Major Products and each Product / Service is then further defined and analysed by subsidiary Product. 6 Products/Markets are covered, 2045 pages, 9772 spreadsheets, 9781 database tables, 537 illustrations. Updated monthly. 12 month After-Sales Service.

NAICS / SIC Product definition: P35194_M : Diesel, Semidiesel and Dual Fuel Engines (Automotive)

**Products & Markets covered:**

**DIESEL ENGINES / AUTOMOTIVE**

1. Diesel/semidiesel/dual fuel engines, automo.: Int.combustion: Under 151 hp
2. Diesel/semidiesel/dual fuel engines, automo.: Int.combustion: 151-200 hp
3. Diesel/semidiesel/dual fuel engines, automo.: Int.combustion: 201-225 hp
4. Diesel/semidiesel/dual fuel engines, automo.: Int.combustion: 226-250 hp
5. Diesel/semidiesel/dual fuel engines, automo.: Int.combustion: 251-275 hp
6. Diesel/semidiesel/dual fuel engines, automo.: Int.combustion: 276hp & over

*See Data Caveat below.*
Financial data

The databases will give financial data for each of the below Diesel, Semidiesel & Dual Fuel Engines (Automotive) Financial Data and Margins, by country, by year Historic from 2007, and a Forecast by year to 2028. Data will be given for EACH of the countries covered.

Balance Sheet Data

To see what such a spreadsheet looks like: http://www.datagroup.org/F0M.xls

Financial Margins & Ratios Data

To see what such a spreadsheet looks like: http://www.datagroup.org/G0M.xls
General Contents

This report provides users with commercial intelligence on markets and industries in over 200 countries. The report analyses the world markets with a basic point of reference, namely a base country. The Client can select the base reference country when ordering the database.

These reports are formatted to give both a narrative description of the various matters covered as well as provide readers with the ability to directly use the Chapters (via Microsoft Word or compatible word processors) to produce their own reports and documentation. Experienced users will be able to use the spreadsheet and databases to generate highly detailed narrative reports, charts and graphics - as well as sophisticated business and commercial forecasts and models. The databases are provided in both Excel spreadsheets and an Access database. Explanatory notes are provided as Word documents or in PDF formats.

As an entry level product the narrative is necessarily illustrative in its terminology and seeks to provide a basic degree of business logic and theory which indicates the rational applied in the forecasting and modelling methodology.

The databases are specifically designed to provide users with a uniform and consistent numeric measure of both (normally) quantifiable values as well as conceptual factors which are (usually) only capable of qualification. Experienced users will know how to apply forecasting and modelling software to the numeric data provided to generate highly detailed and discrete business planning models. The databases provided in this report can be used directly with databases on other product, markets and industries in other countries. The databases are specifically designed to be transnational, currency neutral, inflation and purchasing parity adjusted, product parity and product equivalent adjusted, opportunity cost adjusted, and numerically compatible; they all can be linked or merged programmatically in business planning models to provide multi-national and multi-level analysis.

The report databases are designed to give a common definition, unit of measure and quantification of markets in over 200 countries. These reports rely on data collection at various levels of the product flow: this effectively means, the producer, the distribution channels and the end user or consumers. This data is then correlated with any national and international statistical data produced by official agencies. Unfortunately, product flow data gathering in some countries is difficult, and furthermore the official statistical data is both inaccurate and sparse. In such circumstances, in some countries, we have to flag a Data Caveat as a warning.

Choice of Base Reference Country

As report databases are generated specifically for each client order, the client can select which Base Country the database uses. The choice of a Base Country is important as it puts the database into the client's own perspective. This is important, for example, in respect of Purchasing Parity data or the results of End User Survey data where the world data is presented from the relative position of the Base Country. Where a client does not specify a Base Reference country, the database is generated with the Base Reference country being the same country as the client.

Databases & Structures

Diesel, Semidiesel & Dual Fuel Engines (Automotive) Report Database

This folder contains a number of general files, plus the various main Chapter Files.

Summary Documents

The Report contains 2 Summary documents for the Market Research which can be opened in a Browser or as a Word document and paginated.

If required these files can then be saved as PDF files:-

1. MR_Executive_Summary_Brief.html will render into about 70 pages.
2. MR_Executive_Summary.html will render into about 950 pages.

Market Research

This folder contains the main Market Research files.

Corporate Research

Where the database is specified as having Corporate Intelligence, this folder contains the main Corporate Research files.

NAICS / SIC coded reports and databases

This database is a Market database which is designed to be compatible with U.S. government databases.

For NAICS / SIC coded reports and databases, the report structures, datasets, field names, et al, are an analogue of U.S. Department of Commerce databases, and the U.S. Census databases, are designed to provide an analogue of U.S. Census data, but in a worldwide context. The products are described under their NAICS or SIC coding. This coding system classifies products within Product Codes.

For a full explanation of the NAICS coding system see: http://www.census.gov/eos/www/naics/

These product / revenue lines codes are of course determined by the U.S. Government agencies.

However if users want additional data then this can be extracted from the various databases and surveys as part of the After-Sales Service.
For a detailed Table of Contents for each chapter, database or spreadsheet: click on the Blue headings shown below. This will open a page in your browser which fully specifies the contents of that heading.

**The Data Caveat**

The report databases are designed to give a common definition, unit of measure and quantification of markets in over 200 countries. These reports rely on data collection at various levels of the product flow; this effectively means, the producer, the distribution channels and the end user or consumers. This data is then correlated with any national and international statistical data produced by official agencies. Unfortunately, product flow data gathering in some countries is difficult, and furthermore the official statistical data is both inaccurate and sparse. In such circumstances, in some countries, we have to flag a Data Caveat as a warning. What this means is that in some countries the data is not sufficiently verifiable for statistical purposes and in those cases the data may not be presented.

**Market Research Report**
Diesel, Semidiesel & Dual Fuel Engines (Automotive) World Report

Methodology

For a general description of the methodology used to prepare this database see: Methodology

For more information on DataGroup methodology please ask for a copy of the DataGroup Methodology Manual.

Deliverables

The report will be provided as follows:

1. Executive Brief (90 pages) & Executive Summary (900 pages).
2. Online downloadable Zipped version of the report.
4. 12 months After-Sales Service.
5. 1-2 hour Teleconference / Teamviewer presentation of the report findings if required. See After-Sales Service
6. Dedicated web site access for the report & databases if required. See After-Sales Service.
Diesel, Semidiesel & Dual Fuel Engines (Automotive) World Report

Toolkits

To assist users there are various Toolkits available on request:

Toolkit 1 & Toolkit 2

The Files, Data, Documents, Software, Tools, Utilities and other items provided on these DVDs are supplied for the sole use of the recipient. These items are the property of the publishers concerned and they may not be released or distributed without the express permission of the publisher of each item.

DVD 1

1. Data Manuals
2. Document Templates
3. Help files
4. Manuals Templates
5. Microsoft Utilities
6. OpenOffice
7. Business Plan Images
8. Reference files
9. US Census Data Tools

Because all DataGroup and Data Institute database are directly compatible with U.S. Government databases (especially the Department of Commerce, US census, NIST, Treasury, et al) it is sometimes useful for users to use US Government data handling tools to manage not only US Government data, but also the data provided by DataGroup and Data Institute. Alternatively, if you are already using this US Government software you can simply access the DataGroup and Data Institute databases with the same software. In generate DataGroup and Data Institute databases use the same database parameters, structures and field names as those found in US Government databases, and thus uses can correlate and query databases without undue difficulty.

10. Utilities & Tools

DVD 2

11. Database Utilities
12. Enterprise Resource Planning
13. Integrated Development Environment

If you intend to implement DataGroup and Data Institute databases online (internet or intranet) then an Integrated Development Environment is often the easiest route to data dissemination and data manipulation.
There are about 40 Statistical packages provided in this Toolkit. These are Open-Source packages which are generally free to use.

**Toolkit 4 & Toolkit 5**

These are optional Toolkits which are supplied on request.

Microsoft Server 2003 utilities and resources. These are for clients implementing databases on Microsoft Server 2003 systems.

Microsoft Server 2008 utilities and resources for clients implementing databases on Microsoft Server 2008 systems. Microsoft Server 2012 migration utilities are also provided in this Toolkit.

**DVD 4**

Microsoft Server 2003 utilities and resources. These are for clients implementing databases on Microsoft Server 2003 systems.

**DVD 5**

Microsoft Server 2008 utilities and resources for clients implementing databases on Microsoft Server 2008 systems. Microsoft Server 2012 migration utilities are also provided in this Toolkit.
If you use proprietary corporate planning software then it is easy to use these databases as they are compatible with the following packages:-

**Some Compatible Software products (See the Database Support site for a full list)**

Project Management Software:

ERP Packages:  

**Resource Web**

Sometimes clients also want the data loaded onto a password protected dedicated website for the use of their staff and/or any other persons they may authorise.

The main benefit of these Resource Webs is that the data is available to all the client’s staff and professional advisors wherever they may be, and also when data is updated or new data is added then there is a common and know point of access for that data. Resource Webs are maintained for the use of the client for a period of 12 months from the data of the last data addition or update to that site.

These dedicated web sites are provided as part of the After-Sales Service.

http://www.datagroup.org/about-resource-webs.html

For a more detailed view of a typical Resource Web:

Diesel, Semidiesel & Dual Fuel Engines (Automotive) World Report

**This Diesel, Semidiesel & Dual Fuel Engines (Automotive) Report is an Entry Level product**

As an entry level product the narrative is necessarily illustrative in its terminology and seeks to provide a basic degree of business logic and theory which indicates the rational applied in the forecasting and modelling methodology. First time users should read the Database Introduction as well as the Notes and Definitions links found in each Chapter. There are subtle statistical nuances to some of the spreadsheets and databases which will help the user to fine-tune their models and forecasts to obtain maximum effect and greater accuracy. The database flow chart and database description should be consulted when applying statistical and modelling software.

**Data Product levels**

Because of the sheer volume of data potentially available from DataGroup it has been necessary to create a number of product levels which can provide clients with as little or as much data as one needs. Clients can upgrade their Product level if required.

**Entry level**

Entry level products provide the most basic degree of information supplied by DataGroup. This product can be used to build upon for various business forecasting and planning application. Typically for a World Report this level will produce a database and spreadsheet count of over 9,000 record sets. Each record, if converted into graphs, will itself produce between 1 to 300 graphs.

**Corporate Modelling level**

The Corporate level modelling products provide the tools and information for medium and long term corporate forecasting and planning. These products are bespoke and are specific to the client company in question. Typically this level will produce a count of over 24,000 record sets.

**Econometric Modelling level**

The Econometric level modelling products provide the tools and information for industry level, national, and international medium and long term forecasting and planning. These products are bespoke and are specific to the industry and/or geographic reach of the client company in question. Typically this level will produce a database and spreadsheet count of over 39,000 record sets.

**Presentation level**

The Presentation level products provide the information sought by a client company is a graphical or audio-visual format which is bespoke for the particular needs and applications of the client.

**Real Time Support**

The After-Sales Service can offer client Real-Time Support. This usually involves using a software utility called TeamViewer (an installation program can be found in the Toolkit on your DVD or Hard Disk Drive) which allows the After-Sales Service support staff to directly link to the client’s computer and work with the users in real time.
## Research & Survey Methodology Analysis

Some clients may wish to understand the statistical and methodological basis of the specific research conducted and this can be provided as part of the After-Sales Service.

### Statistical Appraisal of Datasets  (via the After-Sales Service)

#### Sampling
- External Validity
- Sampling Terminology
- Statistical Terms in Sampling
- Probability Sampling
- Nonprobability Sampling

#### Measurement
- Construct Validity
  - Measurement of Validity Types
  - Construct Validity
  - Convergent & Discriminant Validity
  - Threats to Construct Validity
  - Nomological Networks
  - Multi-trait / Multi-method Matrix
  - Pattern Matching Construct Validity
- Reliability
  - True Score
  - Measurement Error
  - Reliability
  - Type of Reliability Analysis
  - Validity
- Levels of Measurement

#### Design
- Internal Validity
  - Establishing Cause & Effect
  - Single Group Threats
    - Regression to the Mean
  - Multiple Group Threats
  - Social Interaction Threats
- Design Development
- Design Type
- Experimental Designs
  - Two-Group Experimental Design
    - Probabilistic Equivalence
    - Random Selection & Assignment
  - Classifying Experimental Designs
  - Factorial Design
    - Factorial Design Variations
  - Randomized Block Design
  - Covariance Design
  - Hybrid Experimental Design
  - Quasi-Experimental Designs
    - Non-equivalent Groups Design
    - Regression-Discontinuity Design
    - Other Quasi-Experimental Design
- Relationships of Pre-Post Designs
- Formulation of the Designs
- Modification & Experimentation

#### Analysis
- Conclusion Validity
  - Threats to Validity
  - Validity Improvements
  - Statistical Control
- Data Preparation
- Descriptive Statistics
  - Correlation
- Inferential Statistics
  - T-Test
  - Indicator Variables
  - General Linear Model
  - Post-test-Only Analysis
  - Factorial Design Analysis
  - Randomized Block Analysis
  - Analysis of Covariance
  - Non-equivalent Group Analysis
  - Regression-Discontinuity Analysis
  - Regression Displacement Analysis

---

The data for this particular datasets is correlated with base data norms, over several time series, to calculate the statistical parameters for the specific datasets. Client can order this analysis at any time during the 12 months After-Sales Service period.
Diesel, Semidiesel & Dual Fuel Engines (Automotive) World Report

Costs

Report Cost

Diesel, Semidiesel & Dual Fuel Engines (Automotive) World Report: Cost £ 2850
Diesel, Semidiesel & Dual Fuel Engines (Automotive) Regional Report: Cost £ 1950
Diesel, Semidiesel & Dual Fuel Engines (Automotive) Country Report: Cost £ 1450
Diesel, Semidiesel & Dual Fuel Engines (Automotive) Town + Country Report: Cost £ 2850

Delivery

Online delivery in 24 hours; plus a back-up DVD shipped in 1 working day.

Payment

If you wish to order this report, please send us an order quoting your account number, or request an Invoice.

The countries marked * indicate a data caveat due to local survey conditions.
Appendix 2 : About the After-Sales Service

The DataGroup / Data Institute After-Sales Service are an independent unit which provides support to DataGroup / Data Institute users. The After-Sales Service is a stand-alone unit which is not connected to any particular Distributor, Reseller or Retailer.

The support is provided on a contractual basis to Account Holders; and on an Ad Hoc basis to retail and non-account users.

Database specificity
The After-Sales Service can only provide support for the specific database(s) licenced to the user. We cannot generally provide data from unrelated databases, unless there is a specific agreement for this.

Costs
The current cost is £75 per hour; this includes all researchers / computer / database access costs. This costing is based on work which is scheduled at off-peak times.

Delivery
We normally seek to fulfil orders in 7-14 days. For more urgent After-Sales Service work the costs depend on the client's time frame and the availability of our researchers.

Telephone Support
Account Holders receive telephone support via their Account Manager. We are unable to offer telephone support to Ad Hoc or retail clients unless there is a specific agreement for this.

Online Support
Account Holders receive online support via their Account Manager. We are able to offer online support to Ad Hoc or retail clients by specific agreement for this. The client will need to install the TeamViewer software on their own computer to allow online assistance.

Quotations
Client will usually be provided with a formal proposal and quotation for After-Sales Service work. This will underline the work which is to be provided and the cost of that work.
How to order After-Sales Services

The After-Sales Service is most effective if users plan their orders sequentially, i.e. extract the basic data which will then lead to more complex data or correlations. This also helps to reduce costs as the use of automated data processing and standard data formats are always less expensive to produce than Ad Hoc work.

What this means is that it is frequently less expensive to obtain a World or Regional report or database rather than separate country data.

Modular research

Once the After-Sales Service understands the general data requirements they will send the Client a Modular Proposal as a Word document. The Client can then select the Parts required, and amend or modify the information objectives.

To delete unwanted elements Clients strikeout those items: Strikeout unwanted items

To insert information objectives Clients do so in Red

Once the After-Sales Service have a final specification, we will then produce a static PDF document which will form the basis of the contract.

The best method to organise the ordering of data is as follows:-

1 Additional Market Research Data
2 Distribution Channels & End Users
3 Survey Data
4 Corporate Data
5 Additional Requirements

Once a client has specified exactly what data is needed, and that specification is available, then the After-Sales Service will produce a written quotation of cost and delivery time.
1. Market Research

Markets & Products

Clients can order data for additional Product and Market Sectors. This will always include data, by year Historic: from 2007, and a Forecast by year to 2028. Data can be provided for up to 200 countries.

Part 1.1
The client can specify Product & Market breakdowns as needed:

Part 1.2
The client can specify Product & Market breakdowns as needed:

Part 1.3
The client can specify Product & Market breakdowns as needed:

Part 1.4
The client can specify Product & Market breakdowns as needed:

End of PART 1
2. Distribution Channels & End Users Data

Distribution Channels & End Users

Distribution Channels

This section can investigate the Product Distribution Channels in the selected Markets. The data is based on a series of existing DataGroup databases:

The client can specify information as needed

End Users

This section can investigate the End Users of the Products in the selected markets. The data is based on a series of existing DataGroup databases:

The client can specify information as needed
3. Survey Data

Supplementary Survey Data for the selected Products & Markets

Product Surveys

Each survey (Suppliers, Distribution Channels, Decision Makers, and End Users) contains 5 sub-sets for Products, Supplier Operations, Buyer & End Users, Trading Area, & Competitors in the selected Markets.

<table>
<thead>
<tr>
<th>Category</th>
<th>Information</th>
</tr>
</thead>
<tbody>
<tr>
<td>Products</td>
<td>The client can specify information as needed</td>
</tr>
<tr>
<td>Operations</td>
<td>The client can specify information as needed</td>
</tr>
<tr>
<td>Buyer &amp; Decision Maker Profiles</td>
<td>The client can specify information as needed</td>
</tr>
<tr>
<td>Trading Area</td>
<td>The client can specify information as needed</td>
</tr>
<tr>
<td>Competitors</td>
<td>The client can specify information as needed</td>
</tr>
</tbody>
</table>

These surveys cover the Markets, Products, Competitors, Operations and Product Flows in terms of the Suppliers, Distributors, Decision Makers, and End Users.
Industry & Supplier Performance

One can investigate the product Industry in the selected Markets. Industry Performance Survey results:

<table>
<thead>
<tr>
<th>Diesel, Semidiesel &amp; Dual Fuel Engines (Automotive)</th>
</tr>
</thead>
<tbody>
<tr>
<td>The client can specify information as needed</td>
</tr>
</tbody>
</table>

Distribution Channels

One can investigate the product Distribution Channels in the selected Markets. Distribution Survey results:

<table>
<thead>
<tr>
<th>Diesel, Semidiesel &amp; Dual Fuel Engines (Automotive)</th>
</tr>
</thead>
<tbody>
<tr>
<td>The client can specify information as needed</td>
</tr>
</tbody>
</table>

Decision Makers

One can investigate the product Buyers and Purchasing Decision Makers in the selected Markets. Purchasing Decision Makers Survey results:

<table>
<thead>
<tr>
<th>Diesel, Semidiesel &amp; Dual Fuel Engines (Automotive)</th>
</tr>
</thead>
<tbody>
<tr>
<td>The client can specify information as needed</td>
</tr>
</tbody>
</table>

End Users

One can investigate the End Users in the selected Markets. End User & Buyer Survey results:

<table>
<thead>
<tr>
<th>Diesel, Semidiesel &amp; Dual Fuel Engines (Automotive)</th>
</tr>
</thead>
<tbody>
<tr>
<td>The client can specify information as needed</td>
</tr>
</tbody>
</table>
4. Corporate Data

Corporate data is available; however this data has to be verified by a telephone survey to ensure that the data is up-to-date. In addition some data will need to be updated, collated and analysed for each target company.

This part is provided as a PDF file or a Word file, as specified by the client.

Data Objectives for each Target Company

The data objectives have to be set by the client and were possible these will be achieved by the research. For example:-

1. Financials: historical sales, forecasted sales, gross profit margin.
   a. By industry sector and application sector as defined by the client.

   For example, for the sales made by a Target Company those products sold to specific categories of customers, how much of their revenue is generated from providing various products, or application to specific categories of customers, et cetera.

2. A list of products produced by the Target Company or sourced from other suppliers.

3. Type of distribution channel, e.g. direct sales to End Users, OEM sales, via specifiers, via importers or distributor, partnering with third party providers, et cetera.

4. Partners by type (e.g. specifiers, product distributor, customer service partner) per country

5. Pricing by product sector defined by the client.

6. Discount structures

7. Capacity by product/market defined

8. Availability of products (% of product in stock versus product to be ordered)

9. Sales by the type of Support for all categories specified by the client.

10. The average Modernization and Upgrades period by Product Sector defined by the client.

11. Customer Perceptions

12. The size (in terms of number) of management team per country, number of field sales persons per country, number of customer service staff per country.

13. Countries covered by the competitors, production sites (city), customer service sites (city), headcount, documentation.

14. Technology and innovation: innovative technology or application developments.

15. Et cetera…

The client can specify any particular data which needs to be covered.
List of Target Companies

The Client may either select the target themselves, or can specify the Top 10 or Top 15 in the World / Europe / individual Country / et cetera.

The client can specify here which Target Companies are to be covered:

1.
2.
3.
4.
5.
6.
7.
8.
9.
10.
Base data objectives for the Target Company

Key Personnel:
1. Chairman
2. Chief Executive
3. Directors:
4. Executives:

Corporate Summary:
5. Company Description
6. Company History
7. Legal Entity & Ownership
8. Company Facilities
9. Company Key Assets
10. Mainline product / service
11. Product / services provided
12. Parent Company
13. Bankers
14. Year established
15. Current employees
16. Issued capital
17. Shareholders

Specific Additional corporate data required on Target Companies

The client should specify any particular corporate data which is needed:

80. -
81. -
82. - .../

These above items are a qualitative analysis of the Target Company. This data is derived from the Surveys of Industry sources, Distribution Channels and Buyers of the products supplied by the target company. This data is not quantified, but is presented as the qualified and subjective opinions of those responding to the surveys.
## Financial Data for the Target Company

The financial data is provided in sections:
1. the most salient Management figures and margins, and
2. a full Balance Sheet and Management Accounts simulation.

### Management Accounts

Management figures for the Target Company: as an Excel file:

<table>

94. Value of Average Investment / Employee
95. Value Added per Employee

NB: These above tables use standard Accounting terms, as used by accountants and financial managers. The Balance Sheet formats are used by accountants when they produce management accounts for companies and when they audit company financial results. The Balance Sheets are not the same as the Cashflow projections. Balance sheets are done on an Annual basis and Cashflow projections are done on a Monthly basis. These documents are usually produced as interactive/dynamic Excel sheets, thus if one set of data is changed (for example Payroll Costs) then this automatically changes the other data in the Balance Sheet or Cashflow projection.

Background to the Derived Financial calculations

There is a radical difference between the published financial data of companies and the Derived Financial calculations shown in these reports.

Whereas a company's published financial data may rely on the auditor's opinion that it is a fair representation of that company's financial situation, it may not reflect the actual financial circumstances of that company.

This is especially critical when evaluating Net Assets or Shareholders Funds. Essentially the Shareholders Funds are what assets would be realisable if the company was liquidated. These are the Liquidated Net Assets of the enterprise.

The software used to produce these calculations search for the realisable assets of the company. Those realisable assets tend to be found as Stock and Inventory (at the current product level valuation), and other Tangible Assets like the actual or current market value of owned Property.

Intangible Assets like intellectual property rights, or goodwill, are only valuable where market conditions are buoyant and optimistic, and allow for the on-going exploitation of such assets.

Certain items, like leased property holdings, are assets during buoyant market conditions in market specific locations; however in depressed market conditions or depressed market locations, these items are a liability because the company are tied to unprofitable locations and are constrained by the terms of the property leases, and other costs.

In many jurisdictions there will be liabilities due to national and local taxes and duties, outstanding social security contributions, and redundancy liabilities. Where a company is trading in difficult market conditions these items should be considered as liabilities chargeable against Shareholder Funds.

The Derived Financial calculations pay particular attention to the off balance sheet activities of the company, and the legal context to those activities. In addition assets which have been mortgaged or pledged or against which there is a charge cannot be regarded as assets; and a calculation must be made in relation to the actual market value of the assets set off against the amount of the charge. In many instances this produces a negative figure, and this is listed as a net liability and deducted from the Net Assets figure.
5. Additional Data

The client can specify information as needed

This section can be used to specify non-Market or non-Corporate data and research, for example:

- Product Data
- Distribution Data
- Processes
- Technologies
- Macro-Economic Issues
- Political Issues
- National Legislation and Regulations
- Product Certification and Conformity Issues
- Demographic Data
- Physical & Geographical data (for example, Highways, Elevations, et al)
- Business Resources

- Et cetera…

For DataGroup distributors, After-Sales Service work is processed by:

DataGroup / Data Institute Support Services
Canary Wharf
London
Tel: +44 700 580 2844
Fax: +44 700 580 2845
Database Products supported by the After-Sales Service

The After-Sales Service support most DataGroup / Data Institute products and databases, including those shown below.

Database Compatibility
The increased use of Database Management Systems, Business Planning and Control Systems, Enterprise Resource Planning, Management Information Systems, and other tools amongst management professionals has produced a critical need for the harmonisation of data across various software applications and systems platforms. The After-Sales Service ensures that its output, where required, will be fully compatible with DataGroup / Data Institute products and databases.

For this reason all the databases and reports provided use harmonised database and data sets; thereby users can obtain any database from any of the publishers, for any of their brands, with the assurance that these databases are fully compatible and can be used in conjunction with one another and the various platforms, operating systems and software.

The DataGroup Stiftung has, since 2007, undertaken the harmonisation and convergence of the database specifications and definitions of the various database providers. This is to allow users a uniform and standardised reference to use with their planning and forecasting; and to allow cross-database functionality.

The data sets, modules and standards shown are now fully harmonised and standardised to allow data and software interflow and cross-platform usage of the databases. Users may obtain older data dictionaries and standards, and/or data sets and data dictionaries for their own national standards. The standard product and market definitions have been harmonised and are provided (in the standard database products supplied), often as the NAICS classifications. Users wishing to remain with the previous SIC classifications may obtain these databases under that classification system. Users requiring other (U.N., European, Japanese, et cetera) classification definitions and norms may obtain those as necessary. Accounting standards are also harmonised according to the U.S. regulatory norms; however other norms are available. Data dictionary and data definition bridges and converters are available to allow users to update or standardise their databases. The DataGroup Stiftung has undertaken to maintain support for the older data dictionary standards and definitions until 2018; however users are urged to update at their earliest convenience.

Database Flowchart + Configuration
The flowchart provides the minimum configuration for the databases provided by the DataGroup / Data Institute publishers and brands. All the data, time and record sets of these databases are fully compatible.

http://www.datagroup.org/BASE_FOLDERS/CHAPTER-HTM/Ch_dg_dataflow.htm

The output provided by the After-Sales Service will respect the standard data configuration to ensure compatibility.
About DataGroup

DataGroup was formed in 1974 by a group of management consultants and information technology specialists whom had previous worked with, amongst other organisations, the U.S. Department of Commerce, Bank of America, Chase Econometrics, The Marketing Strategies Institute, the OECD in Paris, and MITI in Tokyo. DataGroup was established in order to develop a systemised, computerised, and uniform methodology to facilitate real world forecasting models for macro-economic, micro-economic, market, product, and industry purposes.

For full details of DataGroup's history please see: About DataGroup

DataGroup Clients

DataGroup do not publish a list of current client list due to client confidentiality; however a partial list of client in the period 1975 to 2000 is shown here: DataGroup Client 1975-2000
