

Light transmitting concrete

Fiber Optic Lighting solutions enable designers and architects to transform innovative ideas into stunning reality. With the freedom to incorporate a wide variety of special effects into your lighting design, it is now possible to combine creativity and functionality on a multitude of interior, exterior and custom applications.

Product Information

The combination of two extremely versatile materials provides architects and designers a multitude of new creative possibilities.

The concrete panels retain all the properties of high quality concrete. In addition, they display layers of glass optical fibers that transmit light from the back to the panel to the front.

Advantages

White or colourful illumination elements can be utilized to create special light and color effects. Decorative elements used in interior design.

Applications

A multitude of decorative interior architectural elements

Materials

- Concrete
- SCHOTT Optical glass fibers
